

Redmine - Feature #5275

Show tree of issues instead of a list in Roadmap

2010-04-08 20:52 - Alex Last

Status: New	Start date: 2010-04-08
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Roadmap	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description	
Since we have "subtasks" now, it would be better to (optionally) show a <i>tree</i> of issues in the "Roadmap" instead of a <i>list</i> of issues. Is there an overall design ready how subtasks will affect the user interface in general?

+1 please !

#6 - 2011-03-11 16:09 - Sergey Ratz

Why this ticket is closed?

It should be opened.

Is there any plan to implement this request?

Are there plugins (compatible with the latest version of redmine) providing this feature?

Cheers

#11 - 2012-02-23 12:39 - Daniel Albuschat

This is in some way related to #7907. IMHO, the ticket list in the Roadmap should be replaced by - or at least made more similar to - the "normal" ticket list.

+1 current layout nonsensical

#19 - 2018-11-08 02:42 - Mizuki ISHIKAWA

- File `change_roadmap_issues_to_tree_structure.patch` added
- File `roadmap.png` added
- File `before_change.png` added

I propose to change the order of issues in the roadmap in ascending order of Parent task.

The result of applying the patch:

roadmap.png

before change:

before_change.png

#20 - 2018-11-08 08:02 - Go MAEDA

Currently, issues on the Roadmap page are sorted by `tracker_id`. You can see an example on <https://www.redmine.org/projects/redmine/roadmap>. As a committer of Redmine, the order is convenient. This is the similar order with the `[[Changelog]]`.

But the patch attachment:`change_roadmap_issues_to_tree_structure.patch` sorts issues by `issues.id`. I don't like the order.

#21 - 2019-02-03 05:10 - Go MAEDA

- Duplicated by Feature #16026: Roadmap subtask added

#22 - 2019-02-13 20:30 - Jeremy D

I applied the patch provided in #5275-19 and found it extremely helpful. It's not clear to me why it would be a desirable behavior to order by issue number; the order in which an issue is created (and thereby receives a number) has no necessary and sufficient bearing on due date nor relationships with other trackers, which seem like defining characteristics of a roadmap.

A cursory google search seems to indicate that this is a highly requested feature, and Mizuki ISHIKAWA's solution seems to work. Thanks very much.
