Target version:			
Resolution:	Invalid	**Affected version:**	

Description

I have downloded the latest redmine code from ruby forge trunk, initially everything seems to be working, particculalrly i was interested in subtasking feature, but when i installed RequirmentMngt plug-in then subtasks feature is not at all working.

History

#1 - 2010-04-10 11:07 - Felix Schäfer

- Status changed from New to Closed

- Resolution set to Invalid

Please be aware that the subtasks feature is in trunk only for a reason: it's not ready yet. The second thing you mention is that it doesn't work after a plugin has bee installed, please contact the author of the plugin as this doesn't seem to be a problem with the redmine core. Please deactivate all plugins and see if you still have a problem, if that is the case, please file a new bug report and we will be happy to look into it.
