Redmine - Feature #5295

Possibility to filter issues by my role in associated projects

2010-04-12 13:48 - Alexander Usikov

Status:	New		**Start date:**	2010-04-12
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Issues		**Estimated time:**	0.00 hour
Target version:				
Resolution:				

Description

Example: I wan't to see all **completed** but **not closed** tasks in all projects, where **I am** the **manager**, the only one who can close issues.

You need to do your own custom queries.

1. Login for redmine
2. Goto http://&lt:redmine&gt:/issues or "Project" => "View all issues"
3. Input filter as you need for example:
Status = Open
4. Click option then select "Project" at "Group results by" for grouping by project
5. Click save
6. Insert name or filter as you need then press "Save"
7. You will see your custom queries at the right handside on http://&lt:redmine&gt:/issues or "Project" => "View all issues"

Hope this help.
:D

The problem that I can't filter by my ROLE in projects. I participate in many projects, but only in some of them I have role "manager", and I want filter issues only from that projects.
