Description			
<p>Hi,</p> <p>I attached a screenshot of the problem:</p> <ul style="list-style-type: none"><li>- the text_fields are filled with cyrillic chars. The page encoding is set to Unicode (UTF-8). I'm using the native windows language bar.</li><li>- take a look at the drop-down menus for Status (Ã;Ã°Ã° Ã°Ã°Æ'Ã), Version (Ã™ÃµÃ,ÃÃ_Ã):) When I just point the mouse on the project drop-down menu, they disappear.</li></ul> <p>Regards, Nikolay</p>

IE7 seems to have this bug fixed. I could modify this behaviour to hide drop down lists only if IE < version 7.

To be honest, I hate loosing time to make things work with IE, when it runs fine with Firefox :-)

So do I :) I use only Firefox :)  
But there is a lot of users in a company or even in the clients network to ignore it :(  
The drop-down list are not so important to deal with them, but the cyrillic input seems to be :(  
I think for a while how people use IE without even know of existing of Firefox... bad people :))

**#3 - 2007-05-02 13:32 - Jean-Philippe Lang**

Fixed in rev 500.

#### #4 - 2007-05-02 13:59 - Nikolay Solakov

And... Are you intend to look at the first problem?  
In fact this is a problem, maybe I did not wrote it correctly.  
The cyrillic characters are not displayed correctly, it's  
like hex edit :)

Thanks, Nikolay
