

Redmine - Feature #5318

On Issues pages, Options saving doesn't persist sometimes

2010-04-15 00:17 - Dan Andreescu

Resolution:			
Description			
Make the following actions, one by one:			
<ul style="list-style-type: none">• Navigate to a specific project's issues /projects/<<project-id>>/issues• Expand the new "Options" section at the top, under "Filters"• Change the columns that are displayed (to any different set of columns)• Click "Apply"• Navigate to the all issues view /issues or to any other project's issues /projects/<<project2-id>>/issues• Notice that the columns selected in "Options" don't apply any more			
Wouldn't it be an amazing user experience if the Options (not the filter) would be saved per project, so the columns wouldn't have to be selected each time?
