

Redmine - Defect #5339

LDAP authentication only work if onthefly\_register is set (upgrade 0.8.5 to 0.9.3 fails)

2010-04-16 15:29 - Daniel Bond

Status:	Closed	Start date:	2010-04-16

Category:	LDAP	Estimated time:	1.00 hour
Target version:		Affected version:	0.9.3
Resolution:	Invalid		
<p><b>Description</b></p> <p>I've been trying to upgrade Redmine 0.8.5 to 0.9.3, but after upgrade LDAP logins stopped working. I've poked a bit around with ruby-debug, and the source of the problem in models/auth_source.rb line 38:</p> <pre>=&gt; 38      AuthSource.find(:all, :conditions =&gt; ["onthefly_register=?", true]).each do  source </pre> <p>The reason LDAP logins didn't work for me, was that "onthefly_register" setting was not set. I suspect this could affect other users upgrading to 0.9.3 also.</p> <p>I have a couple suggestions how to fix it:</p> <ol style="list-style-type: none"><li>1. remove the check for "onthefly_register" in line 38, because it seems unnecessary</li><li>2. update the UpgradingRedmine wiki-page to mention how to fix it. (or mention in changelog)</li></ol> <p>I'd be happy to fix this, but would like input on how to fix it, so I'm more certain it's the right thing to do.</p>			

History

#1 - 2010-04-16 15:48 - Daniel Bond

I see the user allready is registered in the database (with type set to NULL, if that matters). But when I turn on "onthefly\_register", I can login, but the user is asked to register details like email again.

I tried registering my details again, and get the exception:

SQLite3::SQLException: no such table: member\_roles

#2 - 2010-04-16 15:54 - Daniel Bond

- Status changed from New to Resolved

My bad. I found the cause. I was testing to much, and had a database which wasn't fully migrated.

#3 - 2010-04-16 16:59 - Felix Schäfer

- Status changed from Resolved to Closed

- Resolution set to Invalid

I was thinking that, but hadn't had the time to post. Glad you found that out :-)
