Redmine - Feature #5341

Default issue description per tracker basis

2010-04-16 23:49 - Felipe Campo

Target version:				
Resolution:	Duplicate			

Description

As a template per tracker basis, some times custom fields are not enough or the description in too short (just my examples)
In those cases would be usefull to have a default content of the description field in a per tracker basis that only would be filled if the current description field of the issue is blank or the current content match with de default content of the tracker before it get changed

Would be nice to have this on a per-tracker basis.
And maybe an override for project-tracker combination.

+1

I keep copy-pasting things like this when creating new issues:

Description

Benefits

- benefit 1
- benefit 2

Breakdown:

Validation procedure

- step 1
- step 2

Having it appear by default would hugely help consistency across projects and make requirements much easier to comprehend.

#7 - 2017-02-04 01:47 - Go MAEDA

- Is duplicate of Patch #2931: Templating for description of new tickets by Tracker added

#8 - 2017-02-04 01:48 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Duplicate

Not implemented yet but closing as a duplicate of [#2931](#).
