**Description**

The acts\_as\_event plugin doesn't allow URLs to be linked to outside websites.

For example, the following doesn't work:

```
acts_as_event :title => Proc.new {|o| "#{o.title}"},
              :author => nil,
              :datetime => :updated_on,
              :description => Proc.new {|o| "#{o.description}"},
              :url => "http://yahoo.com"
```
