Description
The acts_as_event plugin doesn't allow URLs to be linked to outside websites.

For example, the following doesn't work:

```ruby
acts_as_event :title => Proc.new { |o| "#{o.title}"},
    :author => nil,
    :datetime => :updated_on,
    :description => Proc.new { |o| "#{o.description}"},
    :url => "http://yahoo.com"
```
