Category:	Text formatting	Estimated time:	0.00 hour
Target version:		Affected version:	0.9.3
Resolution:	Cant reproduce		

**Description**

Hello, I've installed Redmine and found that if I create wiki with revision link on last line, formatting is broken. Here is explanation:  
Good case:

a

r1

b

So we have this in html code:  
<h1 id="abr-r1br-b">  
And display of this is good

Bad case:

a

b

r1

And we must have this:  
<h1 id="abr-bbr-[r1](#)">  
But Redmine see [r1](#) in id and thinks that it's must be a link to revision, so it insert <a href="/redmine/projects/test/repository/revisions/1" class="changeset" title="test revision">r1</a> in id:  
<h1 id="abr-bbr<a href="/redmine/projects/test/repository/revisions/1" class="changeset" title="test revision">r1</a>">  
and formatting here is bad.  
I have:  
Redmine-0.9.3  
actionmailer (2.3.5)  
actionpack (2.3.5)  
activerecord (2.3.5)  
activeresource (2.3.5)  
activesupport (2.3.5)  
fastthread (1.0.7)  
passenger (2.2.11)  
rack (1.1.0, 1.0.1)  
rails (2.3.5)  
rake (0.8.7)

History

#1 - 2010-04-22 11:27 - Yar Isakov

Hey, [r1](#) in Description of this bug is very strange, it is shown as link, then as striked link (and text after it also striked), and then all [r1](#) are non-links

#2 - 2010-12-30 05:57 - Mischa The Evil

- Status changed from New to Closed
- Resolution set to Cant reproduce

Can't reproduce this on the current Redmine trunk. Your use-case is now handled correctly.
