Description

Hello,

we recently updated to redmine **svn 3689** and noticed problem with deleting Time entries in the projects. Editing, adding, viewing is OK, but when we want to delete an time entry we get this error:

```
Processing TimelogController#destroy (for 10.0.1.213 at 2010-04-28 15:17:11) [POST]

Rendering /opt/redmine-alvila/public/500.html (500 Internal Server Error)

Everything else works fine, the upgrade was by the book and without any problem. Not sure if this problem was there before the upgrade or not, noticed this because someone managed to input duplicated time spent on one issue and wanted to delete one.

Sorry for this report, solved the problem by doing some testing.

The whole problem was due to incompatibility of <http://www.redmine.org/wiki/1/PluginCharts> using the older version before...update fixed the problem.
