Redmine - Defect #5425

Showing date in activity page is wrong

2010-05-02 21:21 - minkbear minkbear

Status:	Closed	**Start date:**	2010-05-02
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:			
Resolution:	Duplicate	**Affected version:**	

Description

I opened Activity page on Sun May 2 19:24:33 ICT 2010 (date&time on server).
it shows below or see on screenshot:

Active
From 04/02/2010 to 05/01/2010

Today
......

04/30/2010
......

===
So Today is not 05/01/2010. Is it a bug.
For more information, please let me know.

History

#1 - 2010-05-03 06:27 - minkbear minkbear

forgot to fill Affected version: 0.9.3

#2 - 2010-05-03 10:43 - Felix Schäfer

The time rendered in the html views is not the time on the server but the time according to the timezone rails detects from your browser or the timezone you set in your user preferences. As to why there is such a discrepancy, I can't tell you exactly. Could you give us access to your redmine (the html part) so that we can have a look?

I'm seeing this problem too. I *could* give you access to the redmine part if I understood better what you need in order to get access to that part. I'm uploading two files to better illustrate the problem. You can see that the screenshot from the activity page shows the date and time as being 5/23/2010. The screenshot from the issue page shows the time as being 5/24/2010 2:40 pm. This was via a mouse-over of the "about 6 hours" link. You can see that this is the same issue; the copied text shows this.

I'm not sure if this is exactly the problem being described here, but it is certainly a defect in the Activity page. This is running Redmine 0.9.4.stable.3733 (MySQL).

#4 - 2010-05-27 02:04 - minkbear minkbear

I tried to print value from 2 variables(date, Date.today) in app/views/projects/activity.rhtml
Result:
date = 2010-05-26
Date.today = 2010-05-26

More information:
Server date: Thu May 27 07:02:24 ICT 2010
My Time zone Preferences: GMT+7

1. Why is the value in Date.today = 2010-05-26? It should be 2010-05-27.
2. It always be wrong date in activity page around 0700 AM.

#5 - 2010-08-04 04:59 - Andrew Brock

I've noticed this too but it only happens on the global activity page, not on the group activity pages. "Today" is always set to be the day of the last Redmine activity item.

#6 - 2010-11-17 17:20 - Anton Gavrilov

- Status changed from New to Resolved

Got this problem too. Every morning I get yesterday version of *Activity* page until any issue is updated. Moreover, when I switched my account's language, every page (or at least *Issues*, *New issue* and *Gantt*) got new language with the only exception - *Activity*.

It appears the troublemaker is line 26 in app\controllers\activities_controller.rb (Redmine ver. 1.0.3):

```
if events.empty? || stale?(:etag => [events.first, User.current])
```

My Ruby experience is negligible, but as far as I get it, it blocks rendering new page and instead feeds old version from cache if there is no new events since last rendering. So you'll keep getting the same version of the page with obsolete dates until someone edit any issue. I commented line 26 and 42 (trailing *end*) and it seems it works.

#7 - 2010-11-24 15:48 - Felix Schäfer

- Status changed from Resolved to New

Resolved is limited to commited-to-trunk-but-not-to-stable-yet issues, thank you.

#8 - 2010-11-24 19:09 - Anton Gavrilov

How do I commit to trunk? Or commitment is reserved for developers and I should attach patch instead?

#9 - 2010-11-24 20:30 - Felix Schäfer

Anton Gavrilov wrote:

> Or commitment is reserved for developers and I should attach patch instead?

Yes.

#10 - 2013-01-15 12:00 - Daniel Felix

- Status changed from New to Needs feedback

Any news on this? I'm not able to reproduce this in the Redmine 2.2.1.

#11 - 2013-02-07 07:21 - Phil Miller

I'm still seeing something of this sort in 2.2.2 - the Activity pages don't update to reflect settings changes, in my case timezone, unless something else forces the page to be regenerated. I experienced this while looking at #1048.

#12 - 2013-02-07 11:22 - Daniel Felix

Yes, this seem to relate to #1048. The timezones won't be respected in every redmine module. This is also a big goal for future redmine versions.

#13 - 2016-12-13 07:05 - Ewan Makepeace

+1

#14 - 2017-01-10 13:30 - Toshi MARUYAMA

- Status changed from Needs feedback to Closed

- Resolution set to Duplicate

I think this is fixed by [#14658](#).
See [#24707](#) description.

#15 - 2017-01-10 13:30 - Toshi MARUYAMA

- Is duplicate of Defect #24707: Activity in User Profile shows incorrect date/time, dependent to Time zone added
