Redmine - Feature #543

Wiki links to versions, documents, files

2008-01-09 15:00 - Adrian Tarau

Description

It would be very useful to be able to insert links to roadmap(versions), documents and files. The syntax should be very simple, similar with issue links or changeset links.

Thanks.

Related to Redmine - Feature #2069: Wiki syntax to link to files in the files...	**New**	**2008-10-22**

History

#1 - 2008-01-12 12:21 - Jean-Philippe Lang

Here are some suggestions for the syntax:

document#12 (by id) or document:"My document"
(by title)
0.7.3 or version:"0.6.3"
file#47

What do you think ?

#2 - 2008-01-12 13:33 - Adrian Tarau

Looks ok to me.

I think the layout with keyword#no is better and it will be
similar with what exists now.

Any opinions?

#3 - 2008-01-13 05:50 - Jean-Philippe Lang

I think Redmine could support both syntaxes (with ids or with
names).

#4 - 2008-01-13 16:43 - Thomas Löber

It would be nice if a plugin can add extra wiki syntax like:

Redmine::Plugin.register :my_plugin do
wiki /some_regexp/ do   # create HTML chunk replacing regexp
end
end

#5 - 2008-01-14 15:37 - Jean-Philippe Lang

Here are some examples that work on my working copy.
Feedback is welcome before I commit.

```
Documents:
        document#17 -> Link to document with id 17
        document:Greetings -> Link to the document with title
"Greetings"
        document:"Some document" -> Link to the
document with title "Some document"
    Versions:
        version#3 -> Link to version with id 3
```

```
        version:1.0.0 -> Link to version named
"1.0.0"
        version:"1.0 beta 2" -> Link to version
named "1.0 beta 2"
       Attachments:
        attachment:file.zip -> Link to the attachment of
the current object named file.zip
```

Basically, # is used to reference objects with their ids, : is
used to reference objects with their names.

For now, attachments of the current object can be referenced
only (if you're on an issue, you can only reference attachments
of this issue).
This kind of syntax should be supported in the future:
document#1:attachment:file.zip

+1 JP.

Thanks.

Support for linking to versions and documents is implemented already a long time ago. Only linking to files is still missing, but there exists a seperate
issue for it ([#2069](#)).
Based on the info above; closing this issue as fixed.
