<b>Description</b>	
<p>First off, great job on Redmine. The product and community support have always impressed me. Keep up the good work, as there are many of us who very much appreciate and benefit from it.</p> <p>We use Redmine to manage defects and features for several projects. We would like to specify a default value for priority on a per-project basis, rather than instance-wide. For example, Project A would have a default priority of Normal. Project B would have a default priority of High. I searched around before posting this and saw nothing related. Any ideas how we could achieve this or if it might be on someone's to-do list already.</p>
