Associated revisions

Revision 3786 - 2010-06-19 23:39 - Eric Davis

Display the link name when external links are used in the toc macro. #5445

Contributed by Yuki Kita and Jean-Baptiste Barth

Revision 3811 - 2010-06-24 04:35 - Eric Davis

Sanitize image links and handle nils in the toc formatter. #5445

Based on contribution by Yuki Kita.

History

#1 - 2010-05-05 11:17 - Felix Schäfer

- Subject changed from TOC does not display correctly headers linked to the external to External links not correctly displayed in Wiki TOC

- Target version set to 0.9.5

Not sure how complex the problem is, but I'd wager it's more a small-ish parser/filter issue that could be included in 0.9.5.

#2 - 2010-05-25 15:52 - Yuki Kita

- File formatter.rb.diff added

Fixed

#3 - 2010-05-25 17:07 - Maksim Morozov

- File toclinks.diff added

My variant

#4 - 2010-06-02 10:26 - yamasi yamasi

□□□

#5 - 2010-06-05 06:11 - Eric Davis

Can someone add some tests for these patches? The wiki syntax is a high risk area of code and I want to make sure these changes don't break anything.

#6 - 2010-06-19 23:04 - Jean-Baptiste Barth

- File 5445_git.diff added

Yuki version with pre/post strings detected in LINK_RE regex, and a unit test. Maybe this test should be moved into test/unit/lib/redmine/wiki_formatting/textile_formatter_test.rb ?

#7 - 2010-06-19 23:32 - Eric Davis

- Category changed from Wiki to Text formatting

- Status changed from New to Resolved

- Assignee set to Eric Davis

- % Done changed from 0 to 100

- Resolution set to Fixed

Fixed in [r3786](#). Thank you for adding some tests for this bug, it will make it easier to prevent this from reoccurring later.

#8 - 2010-06-20 00:58 - Eric Davis

- Status changed from Resolved to Closed

Merged to 0.9-stable for release.

#9 - 2010-06-22 13:08 - Roland Discein

- Status changed from Closed to Reopened

[r3786](#) has broken my installation:

```
Processing WelcomeController#index (for 192.168.192.168 at 2010-06-22 14:34:00) [GET]
  Parameters: {"action"=>"index", "controller"=>"welcome"}
Rendering template within layouts/base
Rendering welcome/index

ActionView::TemplateError (undefined method `+' for nil:NilClass) on line #23 of app/views/welcome/index.rhtml
:
20:        <% for project in @projects %>
21:            <li>
22:            <%= link_to h(project.name), :controller => 'projects', :action => 'show', :id => project %> (
<%= format_time(project.created_on) %>)
23:            <%= textilizable project.short_description, :project => project %>
24:            </li>
25:        <% end %>
26:        </ul>

```

Maybe it die while textilizing the short description of one of the last projects in my installation:

```
h2. "Project Name   !/attachments/1234/logo_small.gif! !/attachments/5678/logo_2.png!":/projects/projectname/i
ssues

| "New Issue here":mailto:emissionaddress@mycompany.com?body=Project:projectname |
| "Create issue in Category A":mailto:emissionaddress@mycompany.com?body=Project:projectname%0ACategory:A |
```

What am I doing wrong?

#10 - 2010-06-22 14:23 - Roland Discein

Update:
formatter.rb.diff patch works fine, except it actually cant remove

```
!attachedimage!, version:smth, attachment:file
```

link tags from toc, only

```
"Link name":http://link.address.com
```

, but commited r3786 patch brakes system at every place where it tries to textilize links. For example, MyController displays page, but ProjectsController falls in 500.html..

#11 - 2010-06-22 15:59 - Yuki Kita

- File formatter.rb.diff added

Confirmed.
So I updated the patch.

#12 - 2010-06-24 04:30 - Eric Davis

- Status changed from Reopened to Closed

Roland Discein:

I've applied Yuki Kita's update and also a small change to remove the textile image links !/path/img.gif! from the table of contents generator.
