<b>Description</b> <a href="#">RedmineReminderEmails</a> will just send out notices to everyone. I would suggest making this a personal setting on <i>My account</i> page (like other notifications), allowing to set up the following: <ul style="list-style-type: none"><li>• send/don't send ticket reminders (checkbox);</li><li>• frequency (daily/weekly/custom); can be done like in Hudson - a pure text input allowing cron syntax, defaulting to "0 8 * * *" (daily at 8am);</li><li>• period before the Due/Start date to send out reminders - just like the <i>days</i> switch;</li><li>• tickets to process (two multiselect listboxes - Trackers and Statuses).</li><li>• use only Due or only Start date, or both (checkboxes).</li></ul> Do we have anything cron-like internally?
