<b>Target version:</b>			
<b>Resolution:</b>	Duplicate		
<b>Description</b> Add class of controller+view (home_welcome) to body of page to enable simpler theming of sites, adding classes to buttons and links would also make life a lot easier as currently there's no way to target certain buttons on certain pages, more so if those pages are created by plugins which may affect themes differently to how the style-sheet expected the page layout to be.			
<b>Related issues:</b> Is duplicate of Redmine - Patch #819: Add a body ID and class to all pages <span>Closed</span> <span>2008-03-09</span>

This seems to be implemented in the devel version (wohoo!) so I guess it can be closed (and linked to any ticket that are closed because of this change).

Thanks devteam! ;)
