Description

It would be nice to have support for some common "macros", like e.g.:

- Table of Content
- Include another page
- Perform some search (e.g. get tickets assigned to the user viewing the page)
- etc.

Trac, for example, supports the following:

<http://trac.edgewall.org/wiki/TracWikiMacros>

History

#1 - 2008-02-16 16:36 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Fixed

Table of content and macro support already exist.
The 'include' macro was added in [r1153](#).

For searching tickets, use the ticket module instead.
