

Redmine - Patch #5554

Make links to various redmine objects more consistent

2010-05-19 14:47 - Holger Just

Status:	New	Start date:	2010-05-19

Target version:			

Description

Currently, there are at least two places where links to the different objects are generated:

- the link_to_OBJECT methods in application_helper.rb
- the huge case statement in parse_redmine_links in application_helper.rb

Both of these places use independent code. This code should be merged into a consistent view. Today, both link types differ at least in its class attributes which makes themeing harder.

The attached patch fixes this for the link_to_attachment and the link_to_revision methods.
