

Redmine - Defect #5560

Changing System Time Zone Causes Issue Updates to Change Order

2010-05-19 21:32 - Chris Haverman

Status:	New	Start date:	2010-05-19

Target version:		Affected version:	
Resolution:			

Description

We installed Redmine on a VPS that had its time zone set at one value. We changed it to match our local time. Subsequently, I noticed that new issue updates were out of order on the page.

Is this a defect?

Database	MySQL 5.0.75
Ruby	1.8.7
Rails	2.3.5
Redmine	0.8.7
