

Redmine - Patch #5574

some rtl fixes

2010-05-23 09:11 - Orgad Shaneh

Target version:			
Description			
Hello,			
The journal comments side links (#1 , #2 ...) style is hardcoded in issues/_history.rhtml (<h4><div style="float: right;">) This causes problems with rtl layout, on which it should be left-aligned.			
Changeset changes in issues/_changesets.rhtml should also be used with a css class (just like in repositories/revision.rhtml), in order to align them correctly (they should always be left-aligned).
