

Redmine - Feature #5576

Have Category searches work for subprojects

2010-05-23 21:13 - Burt Culver

<b>Category:</b>	Projects	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b> With a project structure like <ul style="list-style-type: none"><li>• A<ul style="list-style-type: none"><li>◦ Sub1</li><li>◦ Sub2</li></ul></li></ul> <p>If I have a saved search in A that is all open tickets where category is "Marketing" it only finds open tickets in A that are in Marketing even if I add the subproject = all option.</p> <p>I'd like to be able to search all the subprojects by category name too. I can do it subproject by subproject but that isn't convenient.</p> <p>I think this is because the top level category is a different category id than the same named category in subcategories. I think you'd have to change categories to be redmine wide rather than specific to a project for this to work.</p>
