

Redmine - Defect #5620

diff in stable revision and realy revisions

2010-05-30 01:34 - Vladislav R

Status:	Closed	Start date:	2010-05-30
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	0.9.4
Resolution:	Invalid		
Description Current stable 0.9.4 says that it is revision = 3764. Than look here http://redmine.rubyforge.org/svn/branches/0.9-stable/app/helpers/application_helper.rb and look here http://redmine.rubyforge.org/svn/trunk/app/helpers/application_helper.rb?p=3764 and try to find function "checked_image" in stable and in 3764. It looks that this is not really 3764 revision. Problem was find while installing plugins.			

History

Current stable 0.9.4 says that it is revision = 3764.

False. The latest revision which is included in the svn-tag of release 0.9.4 ([source:tags/0.9.4](#)) is [r3733](#) (which created the tag). This tag is taken from the 0.9-stable branch ([source:branches/0.9-stable](#)) which currently holds unreleased changes for the following stable point release ([0.9.5](#)).

The 0.9-stable branch ([source:branches/0.9-stable](#)) currently is at [r3742](#).

The trunk (which contains changes for upcoming major release [1.0.0 \(RC\)](#)) currently is at [r3764](#).

Than look here http://redmine.rubyforge.org/svn/branches/0.9-stable/app/helpers/application_helper.rb and look here http://redmine.rubyforge.org/svn/trunk/app/helpers/application_helper.rb?p=3764

and try to find function "checked_image" in stable and in 3764. It looks that this is not really 3764 revision. Problem was find while installing plugins.

Indeed, as explained above the first link (branches/0.9-stable/app/...) points to the file at [r3742](#) at its maximum. The second link (trunk/app/...) points to the file *in the trunk* at [r3764](#).

See also the [Release Management](#)-page in the [Redmine Developer Guide](#).

Obviously this is not a defect in Redmine thus it will be closed as such.
