I second that. It's the most important missing feature which is making me hesitate between Redmine and Eventum..

This is a smaller implementation of [#12222](#).

The first thing "Mark exceed Due Date" could be implemented by adding a css rule like `tr.overdue{ background-color:#FF0000; }`  
All needed information could be found in the sourcecode of your ticket list.

- Status changed from New to Closed
- % Done changed from 0 to 100

Those marking is implemented with the css class "overdue".  
Just handle it with your design. This could be implemented by some little css-rule.  
Maybe this is implemented in core design. :-)
