

Redmine - Feature #5660

Multiple tabs, login pages with back_url

2010-06-09 11:20 - Michal Gebauer

Status: Closed	Start date: 2010-06-09

Target version:	
Resolution:	
Description	
When I login in one tab simple page refresh in others doesn't work.	
If user is already logged in when visiting login page with back_url then he should be automatically redirected to that page.	
Login on other pages doesn't work because of invalid token but after navigating back to previous page back_url is loaded instead of login page.
