

Redmine - Defect #5666

'Show' view of repository and entry doesn't work in production environment, but does in development

2010-06-10 14:15 - Zhoran Twalve

Status:	Closed	Start date:	2010-06-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	0.9.4
Resolution:	Invalid		

Description

Hi,
I use 0.9.4 stable (MySql)

I set up for my project git repo and in development env. repository view shows me working tree, but in production it shows **the message** *The repository has niether entries nor changes* (I translated it from Russian).

Also entry view works that way, while revision view shows correct info in both environments. Request return code also differs as shown in the table below:

shows	request return code	url
the message	500	/projects/redmine/repository
correct info	304	/projects/redmine/repository/revisions/c1e4527e8d88a0abd9bdd70dfeb94d0e96d53feb
the message	500	/projects/redmine/repository/revisions/c1e4527e8d88a0abd9bdd70dfeb94d0e96d53feb/entry/README.rdoc

What may I did wrong?

```
ps
Ruby version      1.8.7 (i386-freebsd8)

- Status changed from New to Closed
- Resolution set to Invalid

Please use the forums for support requests.

Also note that you need rack 1.0.1, not sure that 1.1 is supported. Please also attach the error trace that leads to the 500 error and have a look at the SCM-error.log in the logs directory in the redmine directory.
