Revision 1130 - 2008-02-10 14:17 - Jean-Philippe Lang

Issue list now supports bulk edit/move/delete (#563, #607). For now, issues from different projects can not be bulk edited/moved/deleted at once.

There are 2 ways to select a set of issues on the issue list:

- by using checkbox and/or the little pencil that will select/unselect all issues (#567)
- by clicking on the rows (but not on the links), Ctrl and Shift keys can be used to select multiple issues

Context menu was disabled on links so that the default context menu of the browser is displayed when right-clicking on a link (#545).
All this was tested with Firefox 2, IE 6/7, Opera 8 (use Alt+Click instead of Right-click) and Safari 2/3.

- Status changed from New to Closed

As of r1130, you can use the little pencil to select/unselect all issues.
