Redmine - Defect #5688

Version editing not accepting valid Date input

Description

When submitting a new Version or editing an existing one, if I attempt to submit a date, I get the error "Date is not a valid date," and the data is not committed to the database. Checking the log file, I can see that the date is exactly correct, in yyyy-mm-dd format with no whitespace.

Commenting out the "validates_format_of :effective_date" line in version.rb fixes the problem, but this is obviously a less-than-ideal solution. The issue has been occurring for several versions now, on two different (but similarly configured) servers.

History

#1 - 2010-06-15 11:52 - Felix Schäfer

Please submit the error trace from the logs.

#2 - 2010-06-15 15:10 - William Wedin

There is no trace. It's a validation failure only.

Here's the entry from the log, though:

#3 - 2013-01-14 15:45 - Daniel Felix

- Category set to Roadmap

- Status changed from New to Needs feedback

I'm not able to reproduce this with Redmine 2.2.1.

Anyone else who can confirm that this bug is fixed?

#4 - 2015-09-27 02:06 - Go MAEDA

- Status changed from Needs feedback to Closed

No feedback for years.
Closing.
