

## Redmine - Feature #5736

### Make possible to include trailing question mark in the hyperlink

2010-06-23 08:40 - Ihor Kaharlichenko

|   |                                  |
|---|----------------------------------|
| <b>Status:</b> New  | <b>Start date:</b>               |
| <b>Priority:</b> Normal   | <b>Due date:</b>                 |
| <b>Assignee:</b>  | <b>% Done:</b> 0%                |
| <b>Category:</b> Text formatting  | <b>Estimated time:</b> 0.00 hour |
| <b>Target version:</b>  |                                  |
| <b>Resolution:</b>  |                                  |
| <b>Description</b>  |                                  |
| <p>Consider the following links:</p> <p>-</p> <p><a href="http://www.red5.org/wiki/Documentation/UsersReferenceManual/GettingStarted/01-Frequently-Asked-Questions#Does_Red5_support_multicast_streaming?">http://www.red5.org/wiki/Documentation/UsersReferenceManual/GettingStarted/01-Frequently-Asked-Questions#Does_Red5_support_multicast_streaming?</a></p> <p>- <a href="#">Red5 multicasting?</a></p> <p>As you can see both automatic and manual link are broken (the anchor contains the question mark as well).</p> <p>I understand that in most of the cases excluding the question mark is the desired behavior (i.e. when you end up a question sentence with a hyperlink). But sometimes (like in this particular case) it is necessary to include it. I suggest to enhance the link syntax to something like "Link text":<a href="http://example.com/#test?">"http://example.com/#test?"</a></p> |                                  |
