Target version:			
Resolution:			
Description We're using "My page" for checking "My tickets" in 99%. I click on My page, then on All issues. Because "My issue list" is probably most visited page in RedMine by developers (not project managers), it should be great to have direct link to "My tickets" in main menu, just to the right from My page: Home My page My issues Projects Administration Help Or you can create some tool for menu customization ;)
