Description

Would be good if you could see all activity (logged time, notes added, etc) for the projects issues, not just when an issue status is changed. I have several long term issues that look like that nothing has happened with them when looking at the activity report

Thanks!

History

#1 - 2012-10-27 22:49 - Daniel Felix

Most information is already available in ticket history.

Only logged time isn't implemented. This could be solved with [#5061](#).

#2 - 2012-10-30 20:18 - Daniel Felix

- Description updated

- Status changed from New to Closed

- % Done changed from 0 to 100

Most of it is implemented. Just those two related loggings should be implemented.
