Description			
<p>Hi, I have a filename - "What's New.txt" in my repository and when I click on it I get the notice_scm_error. I notice this only for this file.</p> <p>Thanks, Nikolay</p>			

History

#1 - 2007-05-09 02:54 - Nikolay Solakov

And something more:
when I click on any View differences concerning a single file (mean the right links for every file on a revision page) I get the same error.

Thanks

#2 - 2007-05-09 13:24 - Jean-Philippe Lang

Hi

First point is fixed in rev 522.

Concerning the second point, does this problem occur for any file ? Could you post the corresponding log (in dev mode) ? In particular, the line that starts with: "Shelling out:" (the svn command in fact).

#3 - 2007-05-09 15:28 - Nikolay Solakov

Hi,

The problem comes with changing the address of the repository. The changes table remains in the old paths.
example:

old: <http://host/svn/repository> concatenated with /project1/file1,

new: <http://host/svn/repository/project1> concatenated with /project1/file1.

new doubles /project1.

Regards,
Nikolay

#4 - 2007-05-09 15:31 - Nikolay Solakov

As for the top link "View differences", it shows just the changeset for the selected revision of the repository. So it works correct. The right individual file links are affected of the problem.

I hope it helps :)

#5 - 2007-05-09 15:38 - Nikolay Solakov

The question is: Is it possible to setting the link for the repository of some project to any path different from root of the repository?
Maybe this is the problem.

#6 - 2007-05-09 15:56 - Jean-Philippe Lang

Is it possible to setting the link for the

repository of some project to any path different from root of the repository?

Yes.

The problem comes with changing the address of the

repository.

How did you change the url of the repository, through the web app or directly in the db ?

The changes table remains in the old paths.

Paths in the "changes" table are always absolute, even if your repository url points to a subdir.
In fact, the root url of the repository is retrieved and stored in db (look at the repository table).

#7 - 2007-05-09 16:07 - Nikolay Solakov

Hi,
Shelling out: svn diff -r 189:190
"http://*.*/svn/build/oraBuild/Development//oraBuild/Development/Tools/MkVer4/ReadMe1st.TXT"@190
--username * --password *

I removed the checkbox of the repo url through the web app. Then I added the url again. Then I clicked SVN Repository for filling the tables in the db. And then I got this in the development log with the error displayed.

Thanks,
Nikolay

#8 - 2007-05-10 13:42 - Jean-Philippe Lang

I would like to know 2 more things:

- what value you have in the root_url field of your repository table (if it was working, you should have something like http://*.*/svn/build/)

- what you get when you run this svn command:
svn info http://*.*/svn/build/oraBuild/Development/
(full output please)

#9 - 2007-05-10 14:15 - Nikolay Solakov

Hello,

My SVN Repo from the web app:
http://*.*/svn/build/oraBuild/Development/

My root_url:
http://*.*/svn/build;

svn info http://*.*/svn/build/oraBuild/Development/

Path: Development

URL: http://*.*/svn/build/oraBuild/Development
Repository Root: http://*.*/svn/build
Repository UUID: af4b8885-56d8-484b-8861-d50510d6205b
Revision: 190
Node Kind: directory
Last Changed Author: niki
Last Changed Rev: 190
Last Changed Date: 2007-05-05 13:09:11 +0300 (Ã'Ã'Ã'Ã' Ã'Ã±Ã'Ã'Ã'Ã'â€šÃ'Ã'°, 05
Ã'Ã'Ã'Ã' °Ã'Ã'
2007)

Hope it helps :)

Thank,
Nikolay

#10 - 2007-05-10 14:16 - Nikolay Solakov

The root_url is without the ";" at the end.

#11 - 2007-05-10 14:40 - Jean-Philippe Lang

Thanks
I found the bug. Rev 528 should fix it.

#12 - 2007-05-11 15:49 - Nikolay Solakov

I think it's ok now.

Thanks,
Nikolay
