Redmine - Defect #5807

Watchers broken

2010-07-02 16:37 - Brandon Bonds

Status:	Closed	**Start date:**	2010-07-02
Priority:	Urgent	**Due date:**	
Assignee:		**% Done:**	0%
Category:	Issues	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Invalid	**Affected version:**	

Description

Watchers are no longer showing on the Issue page, and there's no way to add watchers. When I tried to add watchers in the New Issue page, I get this error:

•translation missing: en, field_watcher_users is invalid

There was no error in the log file, and I seem to still be able to add or remove myself as a watcher.

System info

Database version: MySQL 5.0.51a
Ruby version: 1.8.6
Rails version: 2.3.5
Redmine version: trunk, r3826

History

#1 - 2010-07-02 16:38 - Brandon Bonds

I removed all 3rd-party plugins, with the same results.

#2 - 2010-07-02 17:09 - Felix Schäfer

What version did you previously use? There has been a change in the UI, the watchers are now in the right-hand side. Make sure you have all required permissions, and please post the output of script/about with all this.

#3 - 2010-07-03 18:24 - Brandon Bonds

That was it, I was looking in the wrong place.

Sorry, I just didn't notice the change. I really did look through the issues on this site before I submitted the report, and I didn't find anything. I was previously on r3590 of the 0.9 branch.

#4 - 2010-07-03 18:24 - Brandon Bonds

- Status changed from New to Resolved

#5 - 2010-07-03 21:37 - Felix Schäfer

- Status changed from Resolved to Closed

- Resolution set to Invalid

Thanks for the feedback :-)
