Redmine - Defect #5819

Blocks Layout plugin- Problem with Subprojects

2010-07-05 11:26 - Terence Mill

Status:	Closed		**Start date:**	2010-07-05
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Plugin API		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	0.9.4

Description

I have one root project, along with several subprojects.
After modifying a project overview in settings I get redirected back to overview page but it's empty. This settings doesn't store. I somehow managed to save them for one project and it still shows overview correctly but I can't reproduce it.
For the root project the change I made in the project overview setting was saved, but for subprojects what I have changed in the overview setting page didn't apply. If I clicked the overview setting page after I made some changes, everything is still unchecked.

- Assignee deleted (Eric Davis)

- Resolution set to Invalid

Please contact the author of the plugin with this bug, thanks.

#2 - 2010-12-14 17:56 - Alexey Aleynikov

I noticed that after running migrating Redmine_blocks the connecting to MySQL is lost.

/redmine-1.0.3/tmp$ rake db:migrate_plugins
(in /var/www/home/hosting_aleynikov/projects/redmine/redmine-1.0.3)
rake aborted!
Can't connect to local MySQL server through socket '/var/run/mysqld/mysqld.sock' (2)

And during the editing of overview page of project the name of this wondow has "translation missing: en, edit_overview_page".

Pavel Vinokurov, help us, please.

#3 - 2011-02-18 13:27 - Victor Dulepov

We've posted an update of this plugin to its wiki page . Should fix the issue with subprojects, and several other issues with storing pages' settings. Please check.
