

Redmine - Defect #5834

Emails with trailing spaces incorrectly detected as invalid

2010-07-07 21:13 - Ryan Cross

Status:	Closed	Start date:	2010-07-07
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.50 hour
Target version:	1.0.1	Affected version:	
Resolution:	Fixed		
Description			
currently using 0.9.5.stable.3830			
I originally thought this was a problem with email addresses with a "." in them, where the validation incorrectly identifies this as an invalid email address. (I think this was the problem in 0.9.3, but I have since updated)			
Email addresses with a trailing space(s) are being flagged as invalid. I think it would be better to simply trim any extra space from the input field before validating/saving.			

Associated revisions

Revision 3873 - 2010-07-25 11:50 - Jean-Philippe Lang

Strips user email (#5834).

History

#1 - 2010-07-22 06:15 - Carin Meier

- File 0002-Defect-5834-remove-trailing-whitespace-from-mail-bef.patch added
- File 0001-Defect-5834-remove-trailing-whitespace-from-mail-bef.patch added
- Status changed from New to Resolved

I have added patches to strip the trailing spaces from the mail before validation and save.

(This is my first contribution - so please let me know if I am missing anything - Thanks!)

#2 - 2010-07-25 11:51 - Jean-Philippe Lang

- Status changed from Resolved to Closed
- Target version set to 1.0.1
- Resolution set to Fixed

Fixed in [r3873](#).
