Agreed. I just reorganized 52 projects into a project tree.
Versions, activity, and most other items work perfect and allow a much better overview of all of the work. I was surprised that the news did not flow the same way.

It is natural to display subprojects' news with paratent's news.
So I wrote a patch to fix it.

Very nice, many thanks.

News are also showed in the overview tab. This patch seems missing that.
