Description

I've created new theme without any problems. But when I realize that there are also calendar which I should be able to change as well using the same method, add new css file with include on first line - so this doesn't work! By the way Firebug shows that it's already used as overriding .. only what I can do just change directly calendar.css from global folder!

History

#1 - 2010-07-22 13:34 - Noname Noname

as well in original calendar.css has wrong value for (line 62)
.calendar thead .hilite {
padding: 1px; /* THIS SHOULD BE CHANGED TO 2 because WED is jumping on hover-over */
}

#2 - 2011-03-08 15:10 - Etienne Massip

- Category changed from UI to Themes

#3 - 2015-07-12 10:51 - Go MAEDA

- Status changed from New to Closed

The date picker had been replaced with the JQuery UI Datepicker in Redmine 2.1 and calendar.css was deleted.

#4 - 2015-08-06 14:23 - Toshi MARUYAMA

- Estimated time deleted (2.00 h)
