

Redmine - Defect #5943

in a wiki, the thumbnail plugin executes inside <pre> tags

2010-07-23 06:10 - Jason Eacott

Status:	Closed	Start date:	2010-07-23
Priority:	Normal	Due date:

Category:	Wiki	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		

Description

using the http://github.com/lest/redmine_thumbnails plugin

in redmine 0.9.4 it worked fine and was not invoked as part of a wiki

```
tag,  
but in 1.0.0 RC it is.  
eg:  
  
<pre>  
  {{thumb(example.png, issue=123)}}  
</pre>  
  
results in: Error executing the thumb macro (Couldn't find Issue with ID=123)  
  
is this a redmine wiki problem or a plugin problem?
```

History

#1 - 2010-07-23 09:39 - Felix Schäfer

Can you confirm this behavior with other wiki macros?

#2 - 2016-03-19 05:00 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Invalid
