This seems to be a problem with your upgrade, please visit the forums for help with that. Make sure your migrations (rake db:migrate and rake db:migrate_plugins) all went through well.

Got exactly the same problem after upgrading from 0.9.3 to 1.0.0. rake db:migrate went fine, but in one particular project I get this error. Where should I look to fix this?

#4 - 2010-08-02 16:29 - Nikolay Stokov

I've found out that the problem was caused by an issue in that project. Somehow this issue was not updated by rake db:migrate and had root_id, lft and rgt set to nil. After reupdating issues table with a line from migration code everything's fine.
