

Redmine - Defect #5994

Creating new issue via email submission strips attached emails

2010-07-29 19:22 - Joshua Masek

Status:	New	Start date:	2010-07-29
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:	Candidate for next minor release	Affected version:	
Resolution:			
Description I have our redmine setup to receive emails to create issues using the "Fetching emails from an IMAP server" instructions at http://www.redmine.org/wiki/redmine/RedmineReceivingEmails . I can successfully attach files to these emails and see them show up, except for emails attached to these files. I am attaching outlook msg files to a new outlook email message, and sending that to the redmine account. Should I expect to be able to do this? Of course, the workaround is to manually attach the email after the issue is created.
