Revision 4004 - 2010-08-19 18:35 - Azamat Hackimov

Fixing #6009
Added to all locales required strings.

History

#1 - 2010-07-31 14:19 - Felix Schäfer

Confirmed on a recentish trunk. I first thought this could be related to "sub"-locales (en vs en-GB), but the problem didn't occur with either portuguese or brazilian portuguese. I was able to observe this problem in the "Slovenčina" locale (should be sk), "Српски" and "Srpski" (sr-CY and sr) seem to be affected too, haven't tried much of the others.

#2 - 2010-08-19 18:36 - Azamat Hackimov

- Due date set to 2010-08-19
- Status changed from New to Closed
- Target version set to 1.0.1
- Resolution set to Fixed

This locale-related problem. In all yml files I placed these strings in number section:

```
format:  
  separator: "."  
  delimiter: ""  
  precision: 3
```

These strings sets default style for number formats. Fixed in [r4004](#)
