

Redmine - Defect #6056

Bulk copying of issues does not preserve relations

2010-08-06 11:31 - Anonymous

Status:	Closed	Start date:	2010-08-06
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Duplicate		
Description When bulk copying a set of issues, relations between issues are lost. Example: 500: Issue A <parent_issue_of> 501: Issue B after copying these issues (to another project), i would expect to see there: 502: Issue A <parent_issue_of> 503: Issue B But the relationship is lost.

History

#1 - 2011-07-20 23:58 - Etienne Massip

- Target version set to Candidate for next major release

More like a feature to me.

#2 - 2011-10-20 14:27 - Etienne Massip

- Status changed from New to Closed

- Target version deleted (Candidate for next major release)

- Resolution set to Duplicate

Closed as duplicate of #4403.

#3 - 2011-10-20 22:09 - Mischa The Evil

Etienne, to me it looks like this issue is a duplicate of #8376 instead of #4403 since the author describes the problem specific to the parent-relationship between issues.
