

Redmine - Defect #6060

restricted user can access projects list and issue contents

2010-08-06 17:01 - Mario Scondo

Status:	Closed	Start date:	2010-08-06
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:		Affected version:	0.9.6
Resolution:	Invalid		
Description Hello, I did add a new user with the permission to access the files section of a single project. When the performig a login with this new user I did experience the following problems: <ul style="list-style-type: none">• the user gets an error message after logging in• the list of projects is accessible• when entering project via the project list all issues are accessable (of every project).• when entering projects, where access has been granted, the checking for permissions seems to work properly. However, I did grant access to the files section, but the sections 'Activity' and 'News' are available, too. I do set the priority to 'high' because of the possibility to access data within non-public projects.			

History

#1 - 2010-08-06 17:28 - Mario Scondo

The assigned role has the following property enabled (The rest is disabled):

- Files > View Files

It seams, that the 'restricted' account has access to contents of 'public' projects. But the assigned role contains 'Issue tracking > View Issues' == False.

#2 - 2010-08-06 17:56 - Felix Schäfer

- Status changed from New to Closed
- Resolution set to Invalid

All logged in users also have "non member" (logged in but not member of the project) and "anonymous" (not logged in) permissions on public projects. I think you should read up on the permissions system in redmine, as your confusion seems to stem from there.
