Category:	Estimated time: 0.00 hour
Target version:	Affected version:
Resolution:	
Description	
<p>I'm using LDAP authentication. I often get a failed login when trying to use ldap-based accounts, with this in the logs:</p> <pre>RuntimeError (LdapError: no bind result): /app/models/auth_source_ldap.rb:55:in `authenticate' /var/lib/gems/1.8/gems/activerecord-2.0.2/lib/active_record/associations/association_proxy.rb:125:in `send' /var/lib/gems/1.8/gems/activerecord-2.0.2/lib/active_record/associations/association_proxy.rb:125:in `method_missing' /app/models/user.rb:92:in `try_to_login' /app/controllers/account_controller.rb:46:in `login'</pre>	
<p>It may be related to the following net-ldap bug:</p> <p>http://rubyforge.org/tracker/index.php?func=detail&aid=7392&group_id=143&atid=631</p>	
<p>This bug happens often enough for me that it basically makes the ldap integration unusable. I'm trying the patch listed on that page and I can report back here if it helps.</p>	

Associated revisions

Revision 1148 - 2008-02-15 18:22 - Jean-Philippe Lang

Fix applied to ruby-net-ldap (#608).

History

#1 - 2008-02-12 10:24 - Kioma Aldecoa

I've been running with this patch for about a week and no LDAP problems. So I'd suggest using a net-ldap version with the referenced patch applied.

#2 - 2008-02-15 18:23 - Jean-Philippe Lang

- Status changed from New to Closed

I couldn't reproduce this error. Anyway, I applied the patch in [r1148](#).
Thanks for pointing out the fix.
