#### Associated revisions

##### Revision 3942 - 2010-08-17 01:39 - Eric Davis

Allow key authentication for Boards. #6132

#### History

##### #1 - 2010-08-13 11:48 - Felix Schäfer

If you are on 1.0 you don't need any patches.

Please see [SubmittingBugs](#), especially: What ATOM feed exactly? Does it produce an error in the log?

##### #2 - 2010-08-13 11:53 - Richard Cave

Sorry. It's not a feed from the project, it's a feed from the Forums associated with the project. So if I create a project, then a forum for that project and add a post in the forum then try and access the Atom feed externally I get a 503 error. If I copy the url for the atom feed into a browser it takes me to the login page.

##### #3 - 2010-08-13 13:46 - Felix Schäfer

- Priority changed from High to Normal

Mmh, that works for me:

```
curl "http://orga.fachschaften.org/projects/administration/activity.atom?key=xxxxx&show_messages=1"
```

Could you paste exactly what ATOM link you are trying to access (but obfuscate the key...)? If you have made any modifications to the code to change that, please also revert them. You could also try if the links in the forums here work for you.

##### #4 - 2010-08-13 14:11 - Richard Cave

- File *apache.txt* added

Hello - thanks for the response. BTW - I think Redmine is brilliant.

I've made no code changes.

The url is <http://80.177.48.68/redmine/projects/rmfbcb/boards?format=atom&key=8361485aeaa58a50f8a57a76f0935e84e07f1f84>

If you put this in Firefox you get the authentication page. If you put this in IE you get the message "Feeds with DTDs are not supported.". Works okay with Safari. Doesn't work with RSSOwl at all or Eclipse. Maybe it's the DTD that causing the problem. How would I remove the DTD. Apache log excerpt attached.

##### #5 - 2010-08-13 14:13 - Richard Cave

Also if you use Feed Validator it complains

<http://www.feedvalidator.org/check.cgi?url=http%3A%2F%2F80.177.48.68%2Fredmine%2Fprojects%2Frmfbcb%2Fboards%3Fformat%3Datom%26key%3D8361485aeaa58a50f8a57a76f0935e84e07f1f84>

**#6 - 2010-08-13 14:38 - Felix Schäfer**

Are you sure you have 1.0 or at least that your upgrade went through if you upgraded recently? All ATOM links I could find (the ones for automatic discovery included) are of the form `http://host/projects/identifier/boards/id.atom?key=XXXXX`. Notice the URI called ends in `.atom`, not like the URI you have where it says `format=atom`. Where did you get your redmine from?

**#7 - 2010-08-13 14:45 - Richard Cave**

Hello.

I got the release from BitNami (<http://bitnami.org/>). In the root folder `changelog.txt` has as it's latest entry

Version 1.0.0-0 2010-07-22

\*Update Remdine to 1.0.0

The Remdine is a spelling mistake in the `changelog.txt`

I've checked the `projects_controller.rb` and `index.rhtml` as described in <http://www.redmine.org/issues/5317> and everything is there.

What do I need to change in order to get the `.atom` at the end instead of `format=atom`?

Thanks once again.

Regards

Richard

**#8 - 2010-08-13 17:34 - Felix Schäfer**

Well, you seem to have the right codebase, so I'm a little at a loss here...

Could you have a look at the redmine log (probably in `redmine_dir/log/production.log`), hit the atom link with `wget` or `curl` and paste the error here?

**#9 - 2010-08-14 10:05 - Davis Tan**

Hello, this happens to me too. However, I am using Safari and try to view `feed://myserver/redmine/activity.atom?key=xxxx`

And it returns 0 items.

**#10 - 2010-08-16 11:06 - Richard Cave**

Production logs as follows the first using `curl` and the second `RSSOwl`.

1. Logfile created on Mon Aug 16 10:04:45 +0100 2010

Processing IssuesController#index to atom (for 208.115.138.254 at 2010-08-16 10:05:43) [GET]

Cheers

Richard

**#11 - 2010-08-16 11:27 - Felix Schäfer**

Well, those are calls to the issues ATOM feeds, not to the board ATOM feeds, and they seem to work well. I still don't see the problem.

**#12 - 2010-08-16 12:17 - Richard Cave**

- *File production.log added*

Sorry wrong feed - trying to do too many things this morning.

Excerpt from the log is attached.

Rich

**#13 - 2010-08-16 13:38 - Felix Schäfer**

Ok, try adding `accept_key_auth :show` on a line after `before_filter :find_project, :find_board_if_available, :authorize` in `app/controllers/boards_controller.rb`.

**#14 - 2010-08-16 13:39 - Felix Schäfer**

(and naturally restart the redmine server after that.)

**#15 - 2010-08-16 14:17 - Richard Cave**

- *File production.log added*

Afraid not. Added the code stopped and started services. Added the production.log excerpt. I not get the authentication page when I call

<http://80.177.48.68/redmine/projects/rmfbc/boards?format=atom&key=8361485aeaa58a50f8a57a76f0935e84e07f1f84>

Sorry

Richard

**#16 - 2010-08-16 15:01 - Felix Schäfer**

Richard, are you sure you have 1.0.0? The atom links for a project's boards overview should be of the form `yourhost.com/project/identifier/activity.atom?key=xxx&show_messages=1`, `yourhost.com/project/identifier/activity?format=atom&key=xxx&show_messages=1` should work too, but nothing of the likes you are getting. Could you try if you can access the feed of a single board? It should look like `http://www.redmine.org/projects/redmine/boards/1.atom?key=xxx` (notice the board ID after `/boards/`).

**#17 - 2010-08-16 15:04 - Felix Schäfer**

Ok, nevermid, I see where you'd get links of that form, it's on the forums page when there is only one board in the project, right?

**#18 - 2010-08-16 15:04 - Richard Cave**

See update [#7](#). This is what I've used to determine if I'm running 1.0.0. Is there another way?

Will try single and let you know.

**#19 - 2010-08-16 15:06 - Felix Schäfer**

Last idea, after that I'm really totally out of them: change the `accept_key_auth :show` I made you add earlier to `accept_key_auth :show, :index`.

**#20 - 2010-08-16 15:13 - Felix Schäfer**

Richard Cave wrote:

No, sorry, I was really trying to understand where your link would get from but I wasn't able to make the connection to a forum with only one board (which effectively shows only that board in the forum tab instead of the list of boards if you have more than 1 board configured for that project). Aynway, I was able to reproduce the URL form you get, the problem you have, and the last change I posted made it work for me.

**#21 - 2010-08-16 15:20 - Richard Cave**

Working!! Well done and thank you for your time and efforts. Brilliant!

Regards

Richard

**#22 - 2010-08-16 15:21 - Richard Cave**

- *Status changed from New to Resolved*

**#23 - 2010-08-16 15:23 - Felix Schäfer**

- *Status changed from Resolved to New*

- *% Done changed from 0 to 80*

- *Resolution set to Fixed*

Glad we got this one :) Resolved is for committed-to-trunk-but-not-to-stable-yet though.

Eric or JB, could you commit? The change is to add accept\_key\_auth :show, :index in the boards\_controller.rb.

**#24 - 2010-08-17 01:26 - Eric Davis**

- Subject changed from Atom feeds in project in version 1.0.0 still require authentication. to Allow Key based authentication in the Boards atom feed
- Category changed from Projects to Forums

**#25 - 2010-08-17 01:37 - Eric Davis**

- Status changed from New to Resolved
- Assignee set to Eric Davis
- Target version set to 1.0.1
- % Done changed from 80 to 100

Added in [r3942](#).

**#26 - 2010-08-19 06:35 - Eric Davis**

- Status changed from Resolved to Closed

Merged to 1.0-stable for release in 1.0.1.
