

Redmine - Defect #6144

The rake command redmine:email:receive_imap fails (silently)

2010-08-16 14:45 - herbert koelman

Status:	Closed	Start date:	2010-08-16
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
When running the following script file I'm using:			
<pre>rake -f \$LAB_HOME/Rakefile redmine:email:receive_imap RAILS_ENV="production" \ host=extranet-stme.sf.intra.laposte.fr username="Fo GDI" password="transagdi259*" \ project=lab --trace</pre>			
Nothing is handled and no messages are found neither on stdout nor productin.log file).			
On stdout :			
<pre>(in /tmp) ** Invoke redmine:email:receive_imap (first_time) ** Invoke environment (first_time) ** Execute environment ** Execute redmine:email:receive_imap spirou(redadm) \$</pre>			
When I submit these same mails to redmine:email:read, they are correctly handled. So I understand that the mail contents are okay.			

History

Might your imap server require IMAPS or are the mails stored in a different folder than INBOX?

#2 - 2010-08-16 15:20 - herbert koelman

The server is not using SSL and mails are stored into the default INBOX folder.

Is there a log file I can use to see what the program is doing ? If so, I could send it over.

- Status changed from New to Resolved

I've removed the \ in my shell script and run a new test.

And it's working !!?? Maybe something wrong with the options the rake script received. I'm sure a debug (or verbose) option could have helped me out :-D

I'm closing this defect and thank you for your quick help.
