

Redmine - Defect #6145

Git commit dates not read properly

2010-08-16 14:49 - Felix Schäfer

| | | | |
|---|----------------|--------------------------|------------|
| Status: | Closed | Start date: | 2010-08-16 |
| Priority: | Normal | Due date: | |
| Assignee: | | % Done: | 0% |
| Category: | SCM | Estimated time: | 0.00 hour |
| Target version: | | Affected version: | |
| Resolution: | Cant reproduce | | |
| Description git log says: 2010-08-05 16:45:11 +0200, The rails console says for that commit: committed_on: "2010-08-05 16:45:11" (Which IIRC should be UTC, so it's already wrong here), When viewed in a browser in UTC+2, the repository tab says: 05.08.2010 18:45 (Which is in accordance to what is in the DB). A solution that works for me is to add .utc to the 2 Time.parse() calls in the git adapter (source:/trunk/lib/redmine/scm/adapters/git_adapter.rb#L142 and source:/trunk/lib/redmine/scm/adapters/git_adapter.rb#L191). | | | |

History

#1 - 2010-09-18 13:32 - Felix Schäfer

- Status changed from New to Closed

- Resolution set to Cant reproduce

Mmh, that may have been a weird byproduct of some other stuff I was experimenting with at the time, at least I wasn't able to really reproduce that now (might be rather related to [#6346](#) too). Closing for now.

#2 - 2011-10-25 12:51 - Tristram Laporte
