

Redmine - Defect #6157

Applying custom queries should not redirect away from calendar or gantt pages

2010-08-17 16:09 - Adam Soltys

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Issues	Estimated time: 0.00 hour
Target version:	Affected version:
Resolution: Fixed	
Description If you have custom queries in place, they will be visible on the calendar and gantt pages as well as the issues page. Clicking on them always redirects you to the issues page though. You can go back to the calendar or gantt pages afterwards and the query will be applied, but it'd be nice if you weren't redirected away in the first place. I'll start working on a patch for this issue.

This patch seems to work fine for me...

Note: the change in the `CalendarsController` has become obsolete after [r4245](#).

#3 - 2013-01-15 11:48 - Daniel Felix

- Status changed from *New* to *Needs feedback*

I'm currently not able to reproduce this. Anyone else can confirm this is fixed?

#4 - 2013-08-02 03:56 - Mischa The Evil

- Status changed from *Needs feedback* to *Closed*

- Resolution set to *Fixed*

Yes, I can. To be precise, it was fixed in [r4909](#) for [#7605](#) (instead of for this issue, which was actually posted earlier ;).
