Description

We recently faced a situation where we tried to close a ticket that was blocked (marked as blocked by another one), but didn't figured out that this was blocking "closed status".

I think it shall improve usability by including a warning on top of the ticket stating that the ticket is blocked by XXXXX etc.

Well, it's in the related tickets section already.

I agree. Duplication of information on the issue should be prevented IMHO.

I agree that a little notice next to the status dropdown would be nice. It's a training issue to make sure that users know the effects of linked tickets.

- Status changed from New to Closed

- Resolution set to Duplicate

The request is covered by [#31589](). The feature to show a warning when the issue cannot be closed due to the status of another issue is going to be available in the upcoming Redmine 4.2.0.
