Redmine - Feature #6180

Searchable custom fields do not provide adequate operators

2010-08-20 01:48 - Tom Rochette

Target version:	1.3.0		
Resolution:	Fixed		

Description

Using an integer custom field (called Affected revision, searchable) as a filter in the issues list should provide me with integer operators such as =, !=, >, <, >=, <=, ...

Instead, I am provided with string comparison operators which does not make much sense. It would also be interesting to be able to use range operator to determine a range of values. This is certainly required for both float and integer custom fields.

Installation details:
Database version - MySQL 5.1.49
Ruby version - ruby 1.9.1p378 (2010-01-10 revision 26273) [i686-linux]
Rails version - 2.3.5
Redmine version - SVN revision 4010

- File EXAMPLE_MISSING_FIELD.diff added

Here included is an example of a fix for the integer values. This is by no mean complete but it seems to fix the displaying and filtering using correct operators.
